

BMJ OnExamination Medical student learning and revision resource

BMJ OnExamination is an online learning and revision tool for medical students. The site is designed to support students' learning in medical school by identifying areas of strength and weakness. It is one of the most experienced and effective learning support systems available for medical students today.

What we offer

BMJ OnExamination is divided into resources for those studying in their early years of medical school (years 1-3) and those studying later on (years 4-5), with revision content varying appropriately for each year. BMJ OnExamination features adaptive learning which personalises the website to your educational needs. This effective revision tool means you can analyse your performance and quickly realise areas of weakness where you may need to turn your focus.

Years 1-3

This resource is intended for the earlier years in medical school and focuses on the integration of basic sciences and clinical medicine.

Years 4-5

This resource is designed for the later years in medical school. It has material across all specialties, including data interpretation and clinical images.

Work Smart: Work through content by category area to identify strengths and weaknesses

Work Hard: Work systematically through the case problems

BMJ OnExamination enables you to:

- Test your knowledge and understanding in your own time
- Rate your answers against your peers
- Understand and resolve incorrect answers
- Track your progress with interactive case studies
- Save valuable study time by identifying your strengths and weaknesses
- Focus your revision on specific areas to improve your knowledge

Questions

You can get immediate feedback on the questions answered and the interactive case problems are marked as you proceed, providing answers, explanations and further reading. See how you compare with others and use the web links to get further information. Also, comment on the question and join in discussions with other users.

Immediate explanations of answers

Adapted Learning personalises the site to individual educational needs

Over 2000 'extended matching question' items

Over 900 'multiple choice' questions

Over 130 'short answer' questions

Picture quizzes including X-rays and ECGs

Detailed performance analysis and feedback

Mock exams

Interactive case studies

Choose the learning style that works for you:

- Use Work Smart and work by curriculum area to focus your efforts, identifying your strengths and weaknesses.
- Try Work Hard and work systematically through the case problems.

Learning by testing yourself with questions and answers is a stimulating and effective way of preparing for examinations or just keeping yourself up-to-date.

Analyse your performance

Revision Progress analyses your performance and provides feedback. Understand how many questions you've answered, get your average score and know how you compare to others. Your scores and comparison of performance against your peers will provide a good indication of areas where you are most competent.

Feedback

Use the progress chart on the Category Overview tab and understand the number of case problems answered correctly or incorrectly. The chart will help you identify your areas of strengths and weaknesses in the different categorical areas. It provides the opportunity for you to focus your revision on specific revision areas to improve your knowledge.
